**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamille.

The patent to Kamille discloses a seal card game comprising a scratch lottery ticket, Fig. 7C, having a plurality of play areas. Each of the plurality of play areas having a hidden symbol. The hidden symbols include at least one directional symbol, arrow, and end of game symbols "VOID". Kamille's ticket further comprises a plurality of award areas, "WIN 50 c", "\$5 WIN", that are uncovered only when authorized by the uncovered directional symbols. The total amount of the award paid is based upon the summing of the values of the uncovered authorized award areas. Kamille further recites that the ticket may include a multiplier for determining to total amount of the award, col. 8, lines 46-50.

In regard claims 3 and 10, the only difference between the claimed "bomb" and Kamille's arrows resides in the meaning and information conveyed by printed matter. Such differences are considered unpatentable, *Ex parte Breslow*, 192 USPQ 431.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamille as applied to claims 1 and 8 above, and further in view of Irwin, Jr. et al.

Irwin teaches that the hidden symbols of tickets in a seal card game may be hidden either by scratch-off material, Figs. 7, 8 or pull-tab material, Figs. 46-48. In view of such teaching, it would have been obvious modify Kamille's ticket by hiding the symbols using pull-tab material. This modification would have made the uncovering of the hidden symbols cleaner, no excess scratch-off material to clean up.

5. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kamille as applied to claim 1 above, and further in view of Frito-Lay.

The Frito-Lay seal card game teaches that it known in seal cards games to require that only one of a plurality of play areas on the ticket be uncovered to reveal a hidden symbol. If more than one play area is uncovered, the Frito-Lay seal card game is void. In view of such teaching, it would have been obvious modify Kamille's ticket by simply rearranging the hidden indicia such that the four corner spaces next to each "Start" arrow either has a directional symbol, arrow, or a "VOID" symbol. These four corner spaces would have been called the play areas. The remaining spaces would have been called the award areas. If a directional symbol arrow were uncovered in the

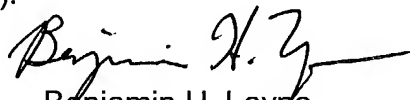

Art Unit: 3712

play areas, the directional symbols would have been followed uncovering award areas. This modification would have made the Kamille's game more challenging and therefore more exciting to play.
